UMESH VISHWAKARMA

Infrastructure & Cloud Engineer | Linux, OpenStack, AWS, Backup & DR

Ahmedabad, Gujarat, India | +91 78020 75688 | vishwakarma11029@gmail.com | linkedin.com/in/vishwakarma11029

Open to remote roles (anywhere) and on-site roles in Ahmedabad / Gandhinagar

PROFESSIONAL SUMMARY

Infrastructure and Linux engineer with 11+ years running production RHEL, CentOS and Ubuntu servers, OpenStack private cloud, AWS, VMware and Proxmox environments. Red Hat Certified System Administrator (RHCSA, 2026). Strong in backup and disaster recovery (Veeam, Acronis), virtual firewall deployment (pfSense, FortiGate, Sophos), server hardening, and hosting applications with Docker, Nginx and PM2. Basic working knowledge of Jenkins and CI/CD; learning Ansible. Focused on uptime, security and DR readiness for business-critical workloads.

TECHNICAL SKILLS

Operating Systems: RHEL, CentOS, Ubuntu; SELinux, systemd, firewalld, SSH, file systems, kernel updates and patching

Private & Public Cloud: OpenStack (instances, tenants, networking, load balancing, storage, Red Hat Ceph / S3-compatible); AWS (EC2, VPC, IAM, S3, EBS, AMI, snapshots, CloudWatch, backup policies, cost optimization)

Virtualization & Hardware: VMware ESXi, Proxmox VE, KVM; Dell EMC iDRAC, HPE iLO, RAID, storage, VM provisioning and snapshots

Backup & DR: Veeam Backup & Replication, Acronis Cyber Protect / DC-DR, Microsoft 365 backup, S3 object storage, snapshot and restore policies, DR validation

Containers & Web: Docker, Dockerfiles, Docker Compose (basic), PM2 (Node.js), Nginx, Apache, Tomcat, virtual hosts, SSL certificates

CI/CD & Automation: Jenkins, CI/CD (basic working knowledge); Git; Ansible (learning); Kubernetes (learning)

Networking & Security: DNS, DHCP, NAT, VPN, VLAN, routing; pfSense, FortiGate, Sophos firewall policies; OS hardening

Monitoring & Scripting: Zabbix, Nagios, CloudWatch; Bash scripting, cron

Databases: MySQL, MariaDB, MongoDB (installation, configuration, backup)

PROFESSIONAL EXPERIENCE

Senior Engineer – Cloud & Infrastructure (OpenStack) | Ishan Technologies **Sep 2025 – Present**

Ahmedabad, Gujarat (On-site)

- Administer the OpenStack private cloud: instance provisioning, networking, storage and resource allocation, with client tenants onboarded and sized to their service SLAs.
- Configure round-robin OpenStack network load balancers to meet each client's requirements.
- Deploy virtual pfSense and FortiGate firewalls and define per-tenant firewall policies.
- Design and implement backup and DR with Veeam Backup & Replication and Acronis Cyber Protect / DC-DR, covering virtual machines and Microsoft 365.
- Provision S3 object storage for each client based on the backup product purchased (Veeam or Acronis).
- Roll out Zabbix monitoring across all servers for hardware health and resource utilization; run proactive health checks to reduce downtime.
- Manage Dell EMC iDRAC and HPE iLO for remote provisioning, hardware monitoring and firmware upgrades.
- Administer production Linux servers for uptime, security and performance, and resolve infrastructure incidents.
- Learning and applying Ansible to automate repeatable server configuration tasks alongside OpenStack and Linux administration.

Sr. System Administrator & DevOps Engineer | Rydot Infotech Private Limited **Jun 2020 – Jul 2025**

Ahmedabad

- Managed 20+ Linux servers (RHEL, CentOS, Ubuntu) for stable, secure and optimized production operations.
- Administered AWS: EC2, VPC subnets, IAM users and roles, S3 backups, EBS volumes, AMIs, snapshots, and CloudWatch monitoring and alerts.
- Improved reliability through OS hardening, kernel patching, firewall rules, SSH security and access controls.
- Configured Apache and Nginx for reverse proxy, SSL, virtual hosts, caching and load balancing.
- Automated log cleanup, backups, service monitoring and health checks with Bash scripts.
- Built, maintained and optimized Docker containers and Dockerfiles; deployed Node.js backend services with PM2 (autostart, log rotation, failover).
- CI/CD & Automation: Jenkins, CI/CD (basic working knowledge); Ansible (learning).
- Supported VMware ESXi and Proxmox clusters: VM provisioning, snapshots, resource allocation and performance tuning.
- Troubleshot production issues including CPU and memory spikes, file system errors, network latency, boot failures and service crashes.

- Configured DNS, NAT, VPN, VLANs, routing and firewall rules on Sophos firewalls.
- Implemented backup strategies and automated snapshot policies, and validated restores for business continuity and DR readiness.

System Administrator | Procurement Technologies Limited **Jan 2020 – May 2020**
Ahmedabad

- Managed Linux servers and cloud-hosted production environments; installed and configured Apache, Nginx, MySQL and MongoDB.
- Handled deployments, updates and performance tuning; configured VPN and firewall rules on Sophos; supported server migrations.

Support Engineer | Infrasoul Techserve Pvt. Ltd **2018 – Dec 2019**
Ahmedabad

- Installed and configured servers, operating systems and enterprise applications; handled updates and patching for production systems.
- Resolved hardware, software and network issues; managed backups and DR procedures; supported infrastructure migrations.
- Managed Dell EMC iDRAC and HPE iLO for remote provisioning, monitoring and firmware upgrades.

Support Engineer | Saltriver Infosystem Pvt. Ltd **Jun 2015 – May 2018**
Ahmedabad

- Provided phone, email and ticket-based support; troubleshot hardware, OS and network issues; installed hardware and configured applications.

KEY PROJECT

Turnout Edge | Rydot Infotech Private Limited
AI-based, cloud-connected employee and student attendance system using touchless face recognition

- Containerized the Node.js frontend and backend with Dockerfiles and Docker Compose for consistent, repeatable deployments.
- Deployed on client on-premises servers and on cloud infrastructure according to each client's needs.
- Configured Nginx reverse proxy with SSL, networking, firewall rules and server hardening for every deployment.
- Handled monitoring, backups, updates and production troubleshooting to keep client environments available.

CERTIFICATIONS

- Red Hat Certified System Administrator (RHCSA) – Red Hat, issued Jun 2026, expires Jun 2029 (Credential ID 260-070-966)
- Veeam Sales Professional (VMSP) – 2025
- Veeam Technical Sales Professional (VMTSP) – 2025

EDUCATION

Diploma in Electronics & Communication Engineering – Government Polytechnic Gandhinagar, 2011 – 2014

LANGUAGES

English, Hindi, Gujarati
